# ABOUT ME

Sue has over 20 years of experience working with the Small Business Development Center (SBDC), where she helped countless businesses with their business strategy and digital marketing needs. Now, she has embarked on her own venture with *Just Sue Creative*, a business that focuses on **website design, SEO services, branding, content creation, and comprehensive marketing solutions.**

Sue Pitts, Founder  
JustSueCreative.com  
[Sue@JustSueCreative.com](mailto:Sue@JustSueCreative.com)  
712-269-9977

# Just Sue

“

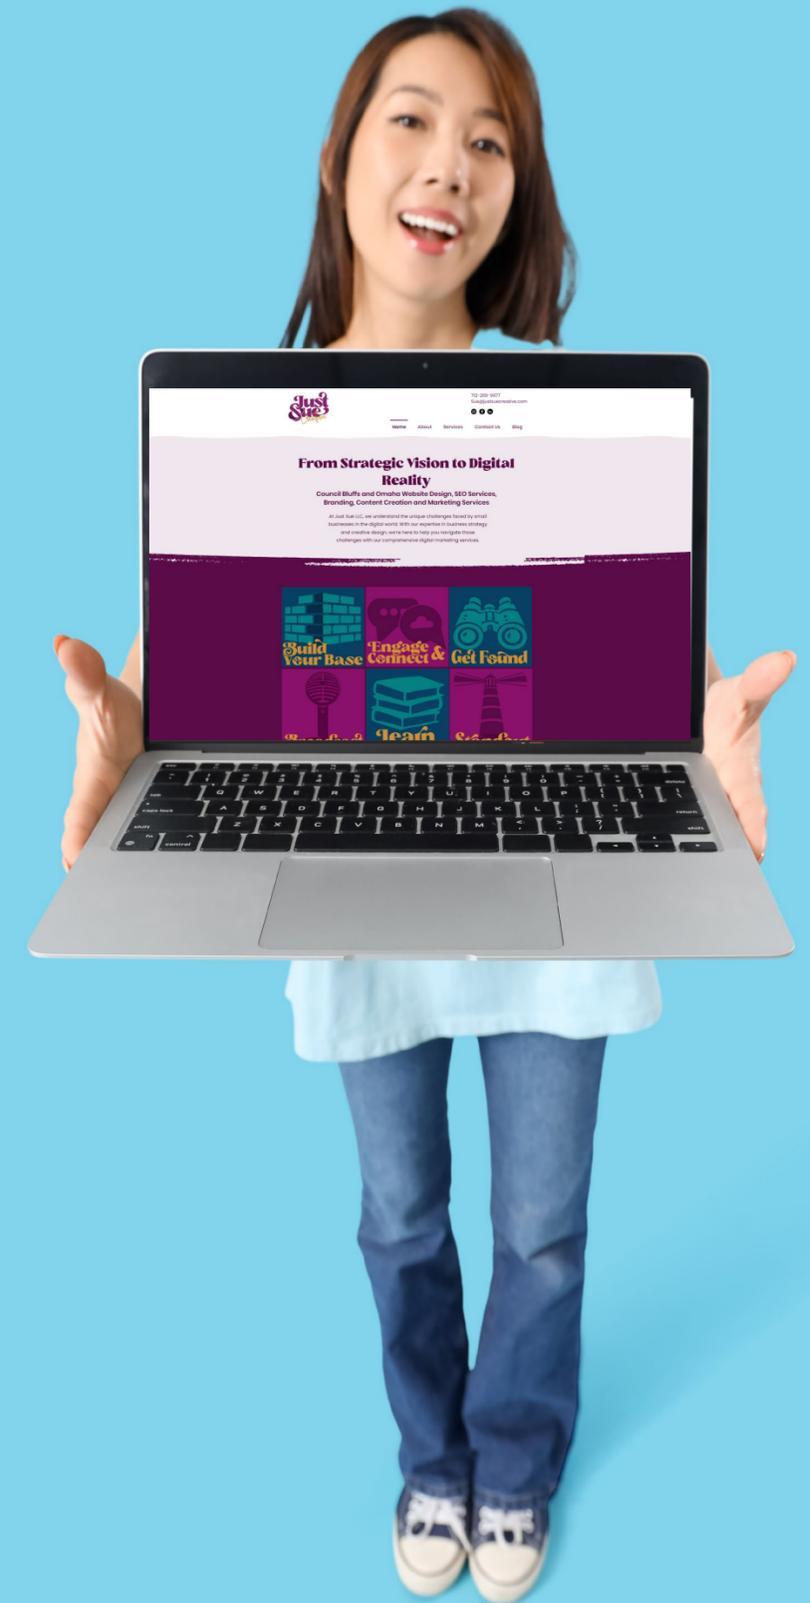

I've spent years advising businesses on how to strategically align their digital and business strategies, only to watch them not fully execute it. Now, I want to not only do it for them but ensure strategy and education are woven into every step.

”

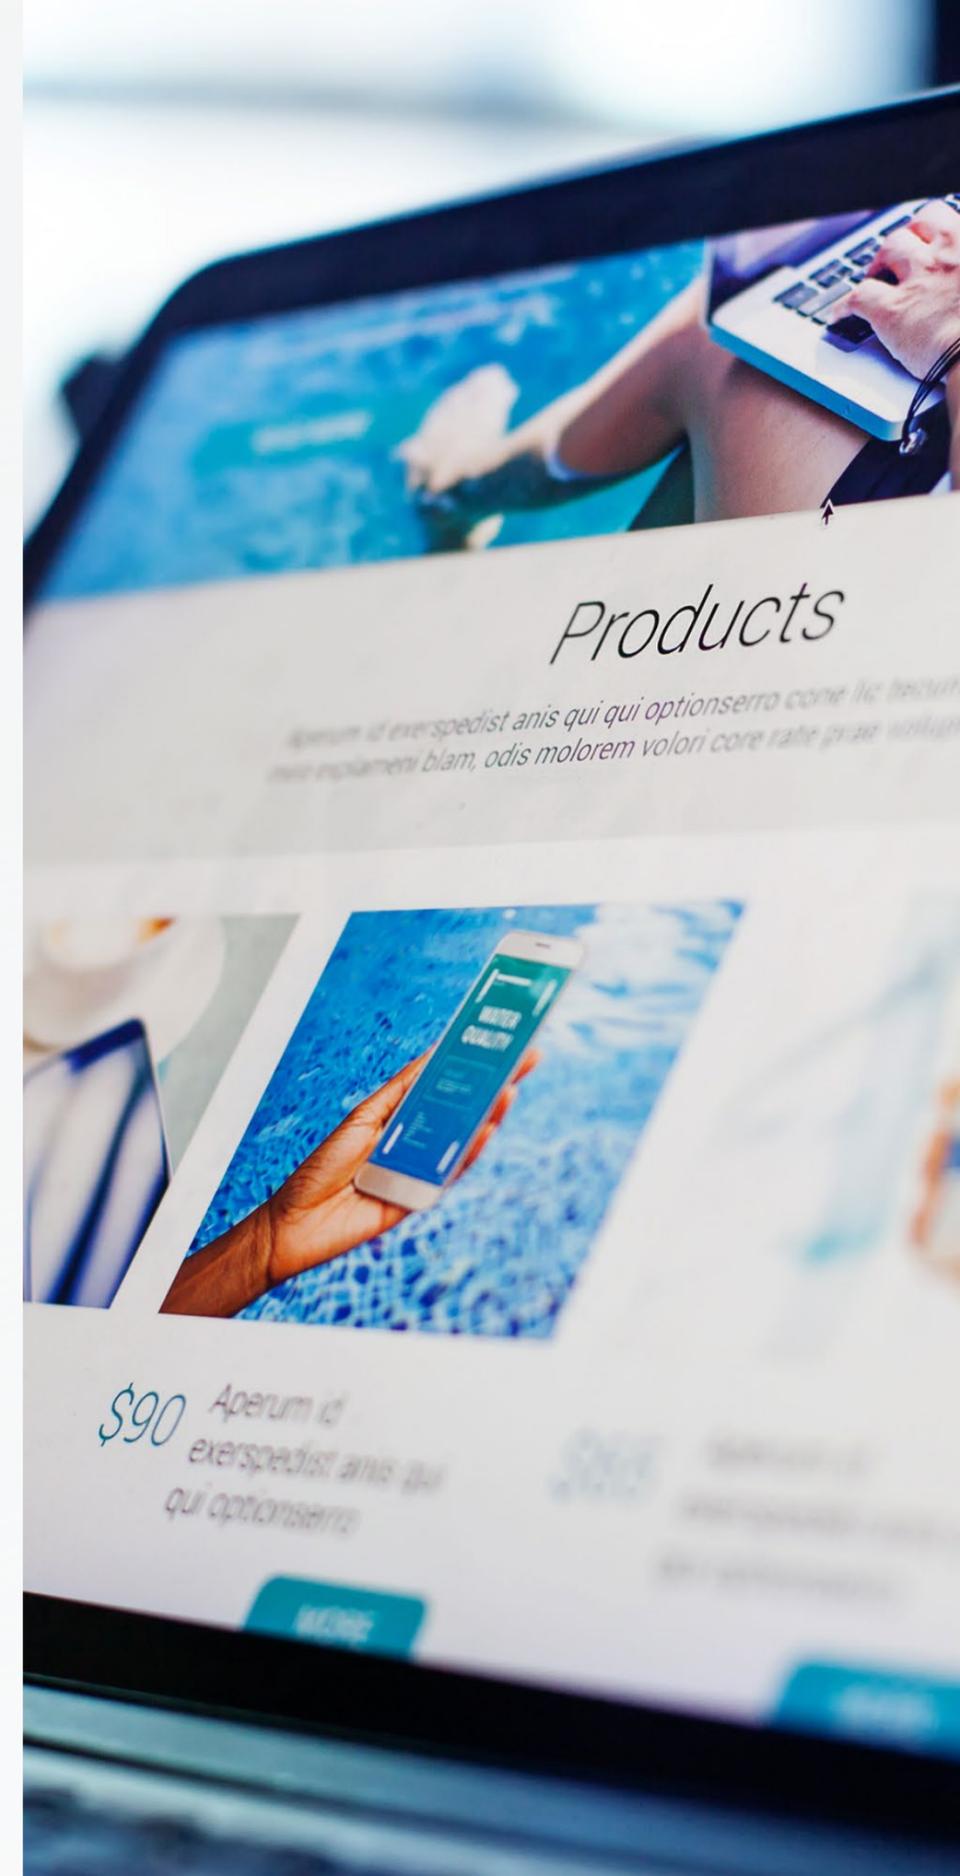

# WORKSHOP GOALS

- 1 Help counselors assess why websites are not attracting visitors or ranking in search engines.
- 2 Teach how to structure website content around **customer intent, clarity and entity relevance** to improve SEO.
- 3 Explore how **AI-powered search (like AI Overviews and ChatGPT)** is changing how content is found—and what it means for small business websites.
- 4 Demonstrate how to use **AI tools** (like ChatGPT) to assist with SEO tasks such as keyword discovery, FAQs, meta tags, and website audits.
- 5 Provide practical templates and tools (SEO Intake Form & Easy SEO Audit) for evaluating and improving client websites.

1

# THE ROLE OF A WEBSITE

# A WEBSITE IS A BUSINESS ASSET

Build Credibility

Give control over branding & Marketing

Expand Reach beyond the physical Location

Provide 24/7 accessibility for customers

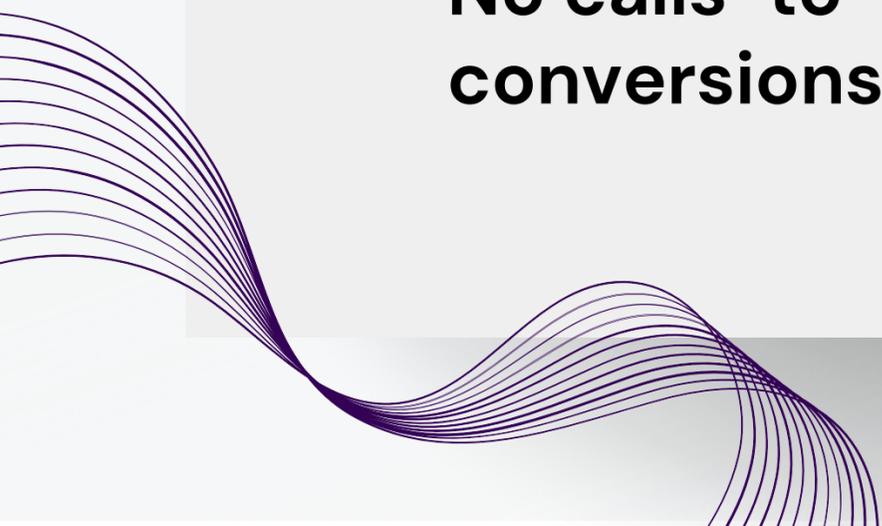

Support Google and AI Search Visibility

# WHY SOME WEBSITES FAIL

- **Unclear purpose and messaging**
- **Lack of SEO optimization**
- **Poor user experience (slow, hard to navigate)**
- **No calls-to-action (CTA) to drive conversions**

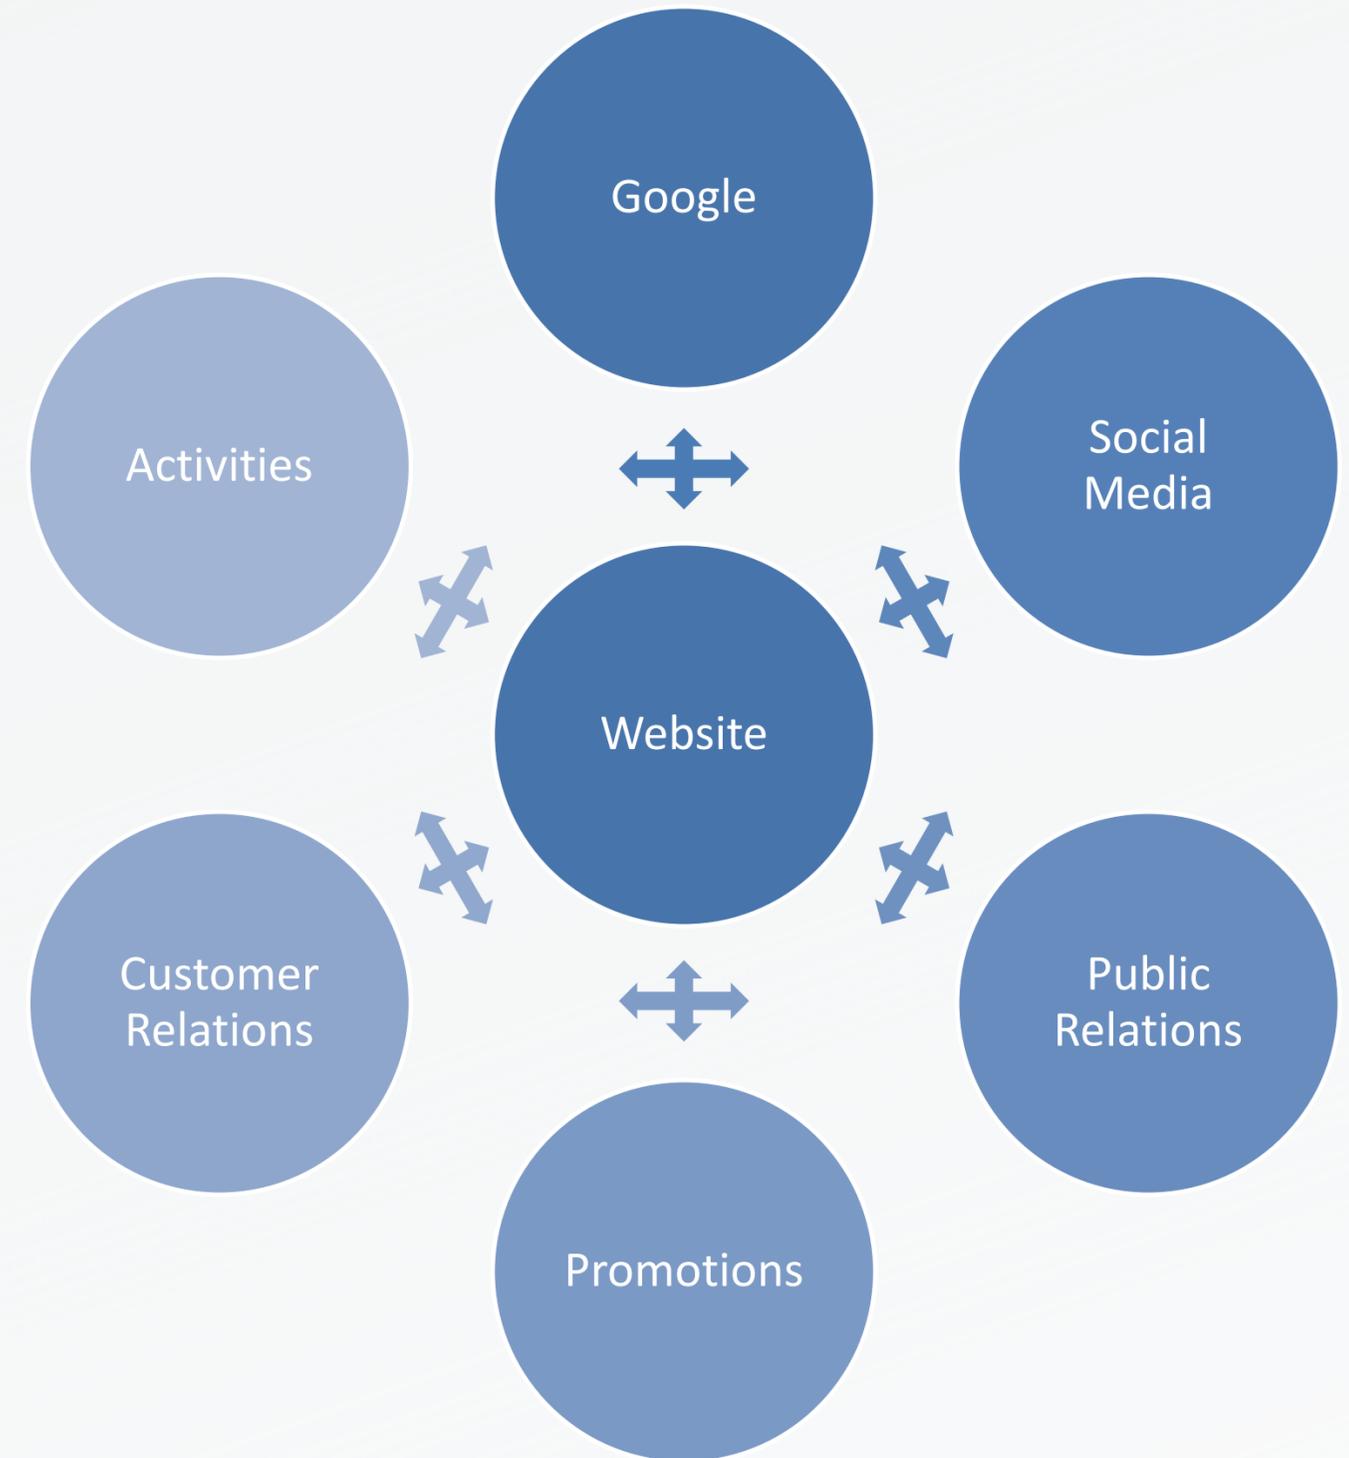

2

# WEBSITE STRATEGY

# DEFINING THE WEBSITE

- ☑ **Before optimizing a website, define:**
  - Purpose** – What does the website need to accomplish?
  - Goals** – What actions should visitors take?
  - Audience** – Who are they? What are they searching for?
  - Advantage** – Why should they choose this business over competitors?

Your website is your **HUB**

# ALIGNING CONTENT WITH BUSINESS GOALS

- **Business Objectives:** Tailor content directly to businesses goals (drive sales, enhance brand awareness, etc)
- **Customer-Centric:** Focus on solving real problems and answering real questions your audience is asking.
- **Bridge Values:** Align your internal values with what your customers care about.
- Content as a Solution – Position content to let the customer know they are in the right place. This will solve their problem

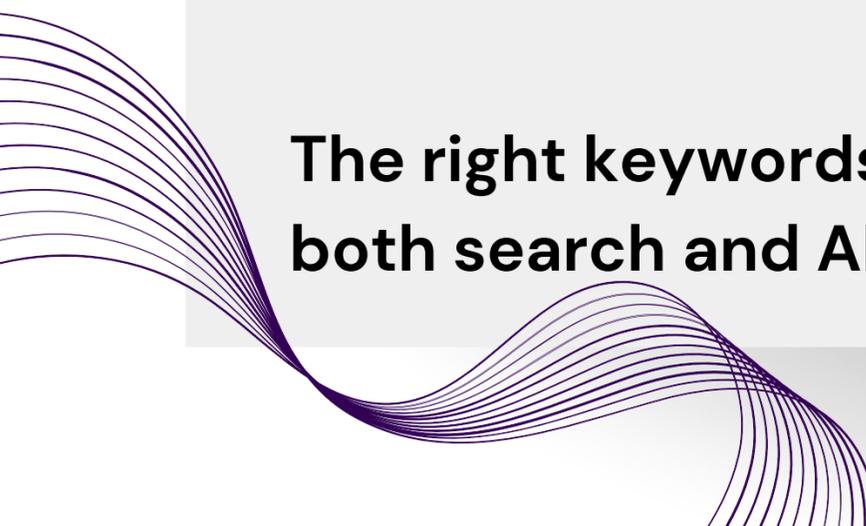

# MATCHING WEBSITE CONTENT TO SEARCH INTENT

Google and now AI-powered search tools rank sites based on:

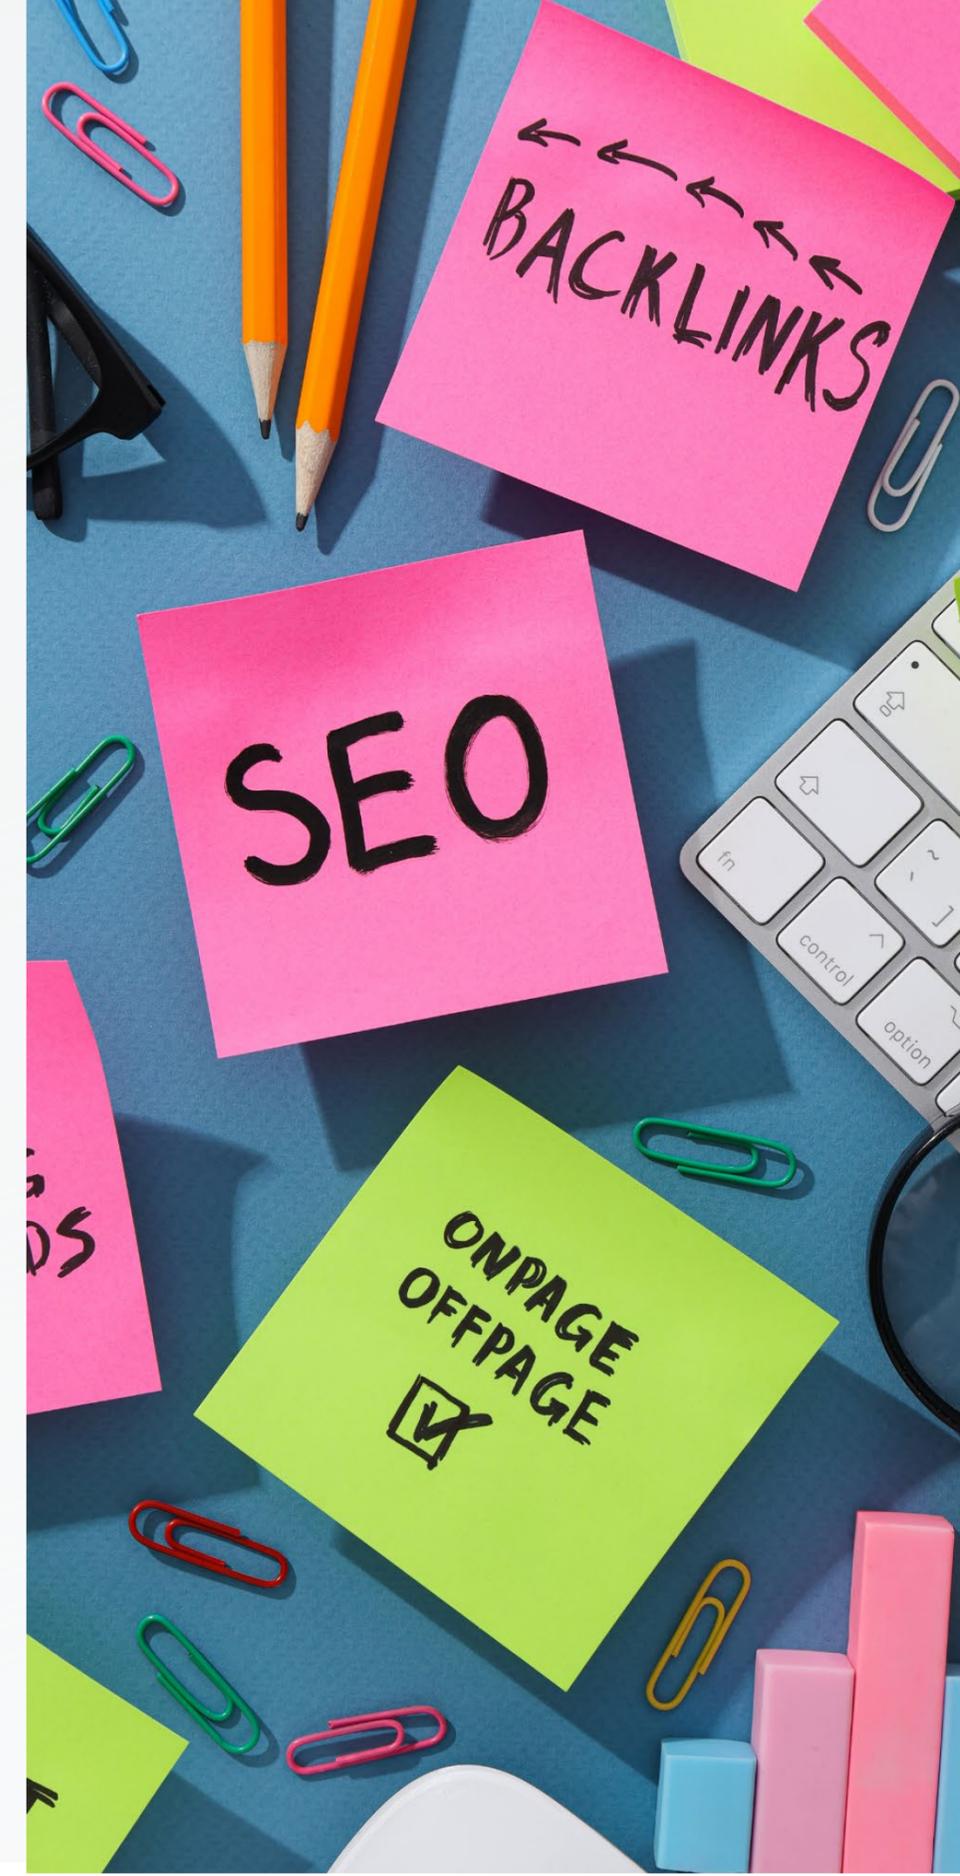

- **Relevance** Does the content match what the user is really looking for?
- **Authority** Does the site demonstrate expertise? Are other trusted sites linking to it?
- **User Experience** Is the site easy to navigate, mobile-friendly and fast loading?
- **EEAT** – Experience, Expertise, Authoritativeness and Trustworthiness

**The right keywords + helpful, high-quality content = better visibility in both search and AI**

4

# Understanding SEO

# WHAT IS SEARCH ENGINE OPTIMIZATION (SEO)

The marketing discipline focused on growing visibility in organic (non-paid/free) search engine results. SEO is not only about building search engine friendly websites. It is about making your site better for humans too.

It is NOT Pay Per Click or paid ads on google, facebook, etc. SEO involves algorithms and not paying to get up higher in search engine results (SERPS)

# HOW SEARCH ENGINES WORK

## Keyword Phrase

- A customer is searching for something. They are trying to solve a problem.
- The words they use in Google is how google finds what they are looking for.

Google

help for starting my business in council bluffs iowa

search engines provide answers based on an algorithm that involves

- Keywords
- Relevance
- Importance (links and shares)
- On Page factors
- Off page factors

## How Search Works

# AI SEARCH - 2025

Search today isn't just blue links on Google

## AI is showing up in places like

- **Google's Search Generative Experience (SGE)** (AI overviews) Answers shown above regular results
- **ChatGPT, Bing Copilot, LLMS:** Chat-based search tools that answer questions using your Content
- **Voice and Mobile assistants:** AI is powering what people hear and see when they search on the go.\

AI search tools are changing how people discover businesses—and what content gets seen first.

The screenshot shows a Google search interface. At the top left is the Google logo. To its right is a search bar containing the text "where should i eat in orlando if i am gluten free". Below the search bar, there is a section titled "AI Overview" with a blue star icon. To the right of this title are several utility buttons: "Export", "Post Audit", "Photo Audit", and "Review Audit". Below these buttons are two tabs: "Dashboard" and "SEPP Checker". The main content of the AI Overview is a paragraph: "For gluten-free dining in Orlando, consider theme parks like Disney World and Universal Orlando Resort for their extensive allergy-friendly options and chef consultations. Dedicated gluten-free establishments include the bakery Erin McKenna's and restaurants like Fresh Kitchen and Bolay. Other popular choices with accommodating menus are Raglan Road Irish Pub and Tutto Italia Ristorante." Below this paragraph are three sub-sections: "Theme Parks" with a sub-heading "Disney World & Universal Orlando Resort:" and a description; "Erin McKenna's Bakery (Disney Springs):" with a description; and "Dedicated Gluten-Free Restaurants" with a bulleted list of "Fresh Kitchen" and "Bolay". At the bottom of the AI Overview section is the heading "Restaurants with Gluten-Free Options".

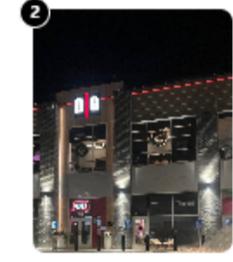

What is the best Gluten Free Restaurant in Des Moines Iowa

Here are some top-rated gluten-free restaurants in the Des Moines area—each offering unique and reliable options, especially if you're celiac or avoiding gluten:

**1 Fresko**  
 Open now until 11:00 PM · New American · \$\$\$\$ · 3.9 (9 reviews)  
 Farm-to-table natural-food restaurant with many dishes that \*can be made gluten-free\* ("GF2" plates)

Directions Website Call

**2 Destination Grille**  
 Open now until 11:00 PM · American · \$\$\$\$  
 Locally-owned with an \*extensive gluten-free menu\*—zero gluten in fryers, GF versions of steak, pizza, gnocchi, more

Directions Website Call

**3 HoQ**  
 Open now until 10:00 PM · New American · \$\$\$\$ · 4.0 (60 reviews)  
 Farm-to-table with nearly entirely gluten-free evolving menu (salmon, cake, etc.)

Directions Website Call

**Top Options at a Glance**

- **Bar Nico**  
 100% gluten-free kitchen—Mexican plates with hand-ground corn tortillas and no flour used. This is a go-to for worry-free gluten-safe dining. [OpenTable +10](#)
- **Destination Grille (Grimes)**

# HOW AI READS YOUR WEBSITE

AI tools don't just look for keywords—they try to **understand** your content the way a person would.

They scan for:

- **Clear page structure** (headings, sections, organized content)
- **Consistent business info** (who you are, what you do, where you're located)
- **Content** that answers real questions in a helpful, trustworthy tone

Think of AI like a reader looking for the best answer—not just the one with the most keywords.

Google uses its Knowledge Graph to connect your business to keywords, locations, and industries. The better AI understands your site, the more likely you are to be featured in results.

To show up in AI-driven results, your website must:

- Be clear, structured, and written for real people
- Demonstrate experience, expertise, and trust (E-EAT)
- Help Google understand your services, topics, and identity This is where entities matter.

# The Buying Process

- Use google when we have a problems and looking for solutions
- Use Google to evaluate and exhaust all potential solutions
- Inquire with company last
- The only chance for customers to notice and even consider your bushiness is to show up in Organic or Local search results.

3

# WEBSITE STRUCTURE & MUST-HAVE PAGES

# HELP GOOGLE UNDERSTAND WHO YOU ARE

Google uses ENTITIES to build its Knowledge Base and connect content across the web

**People, Places, Businesses, Topics, Things**

**To get recognized as an entity, your website must clearly communicate:**

- **Who you are** (business name, location, team, credentials)
- **What you do** (services, products, industries served)
- **Why you're credible** (reviews, awards, expertise)

**How to support this:**

- Use consistent business info across your website and online listings
- Write clearly about your expertise and offerings—this is part of EEAT
- Structure content with headings, internal links, and schema markup (when possible)

**The goal: Help Google confidently connect your site to related searches and show you in results, maps, and AI summaries.**

# THE HOMEPAGE

## The Home Page Should

Deliver an elevator pitch (above the fold)

Include service/product summaries with links

Have a clear CTA (Schedule a Consultation, Shop Now, etc.)

Explain Why Us? (trust, testimonials, expertise)

Introduce About Us (Authority/expertise)

# THE ELEVATOR PITCH

Your homepage headline should:

Clearly state who you help and what you do

Solve a problem customers are searching for

Be simple, clear, and keyword-rich

Example:

## From Strategic Vision to Digital Reality

Council Bluffs and Omaha Website Design, SEO Services, Branding, Content Creation and Marketing Services

At Just Sue LLC, we understand the unique challenges faced by small businesses in the digital world. With our expertise in business strategy and creative design, we're here to help you navigate those challenges with our comprehensive digital marketing services.

# MUST-HAVE PAGES BEYOND THE HOMEPAGE

Every website should include:

**Homepage** – Clearly communicates the value proposition

**About Us** – Builds credibility, company story

**Products/Services** – Dedicated pages optimized for search

**Contact Page** – Includes location, contact form, and Google Business Profile link

**FAQ Page** – Answers common customer questions

**Testimonials** – Builds trust

**Blog** – Helps with ongoing SEO. Answers customers natural questions

**Privacy Policy & Terms of Service**

5

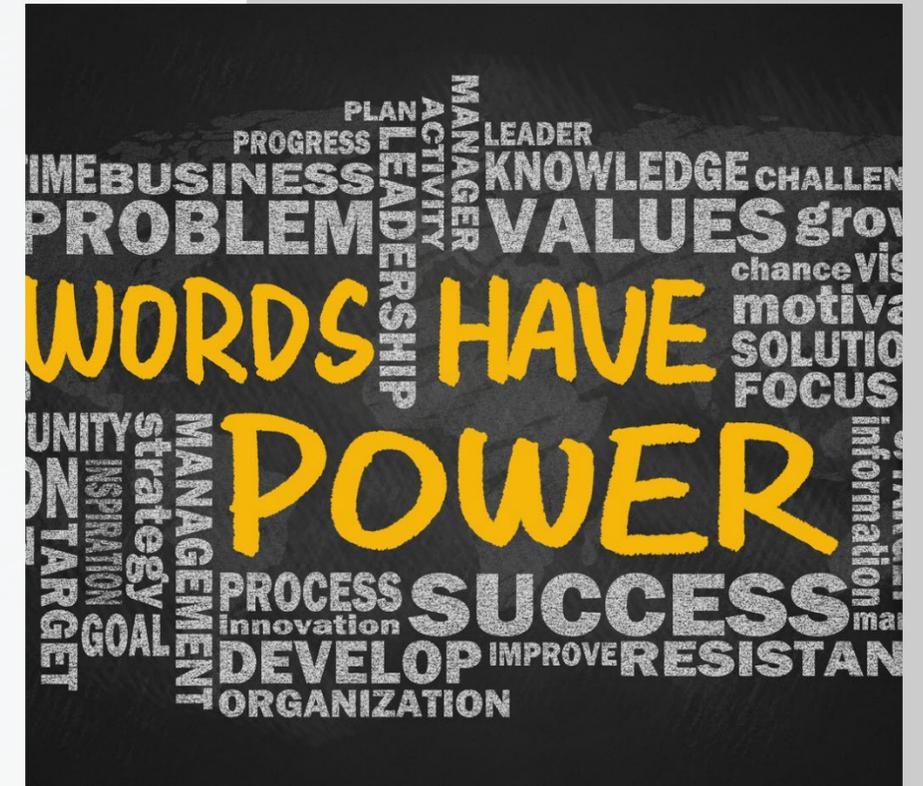

# KEY WORD RESEARCH

# WHERE KEYWORDS SHOULD BE USED

- Title Tags
- Meta Descriptions
- Headers (H1, H2, H3, etc.)
- Body Content
- Alt Text for Images
- URLs
- Anchor Text (Internal Links)
- Blogs
- FAQs

6

# ON PAGE SEO

# ON PAGE SEO - FOR ALL PAGES

- Focus **keyword** for every page
- Clean, readable **URL Title** tag with natural keyword use (under 60 characters)
- **Meta description** that encourages clicks (under 160 characters)
- One **H1** per page, with **H2s/H3s** for structure
- Descriptive **alt tags** for images
- **Internal links** to related pages
- **Fast load times** on desktop and mobile
- **Sufficient word count** for depth (not fluff)
- **Clear content structure and trust signals EEAT** (author info, testimonials, contact details)

Chrome Extension Tool

[Detailed SEO Chrome Extension](#)

# TITLE TAGS & META DESCRIPTIONS

**Title Tag** – The most important ranking factor.

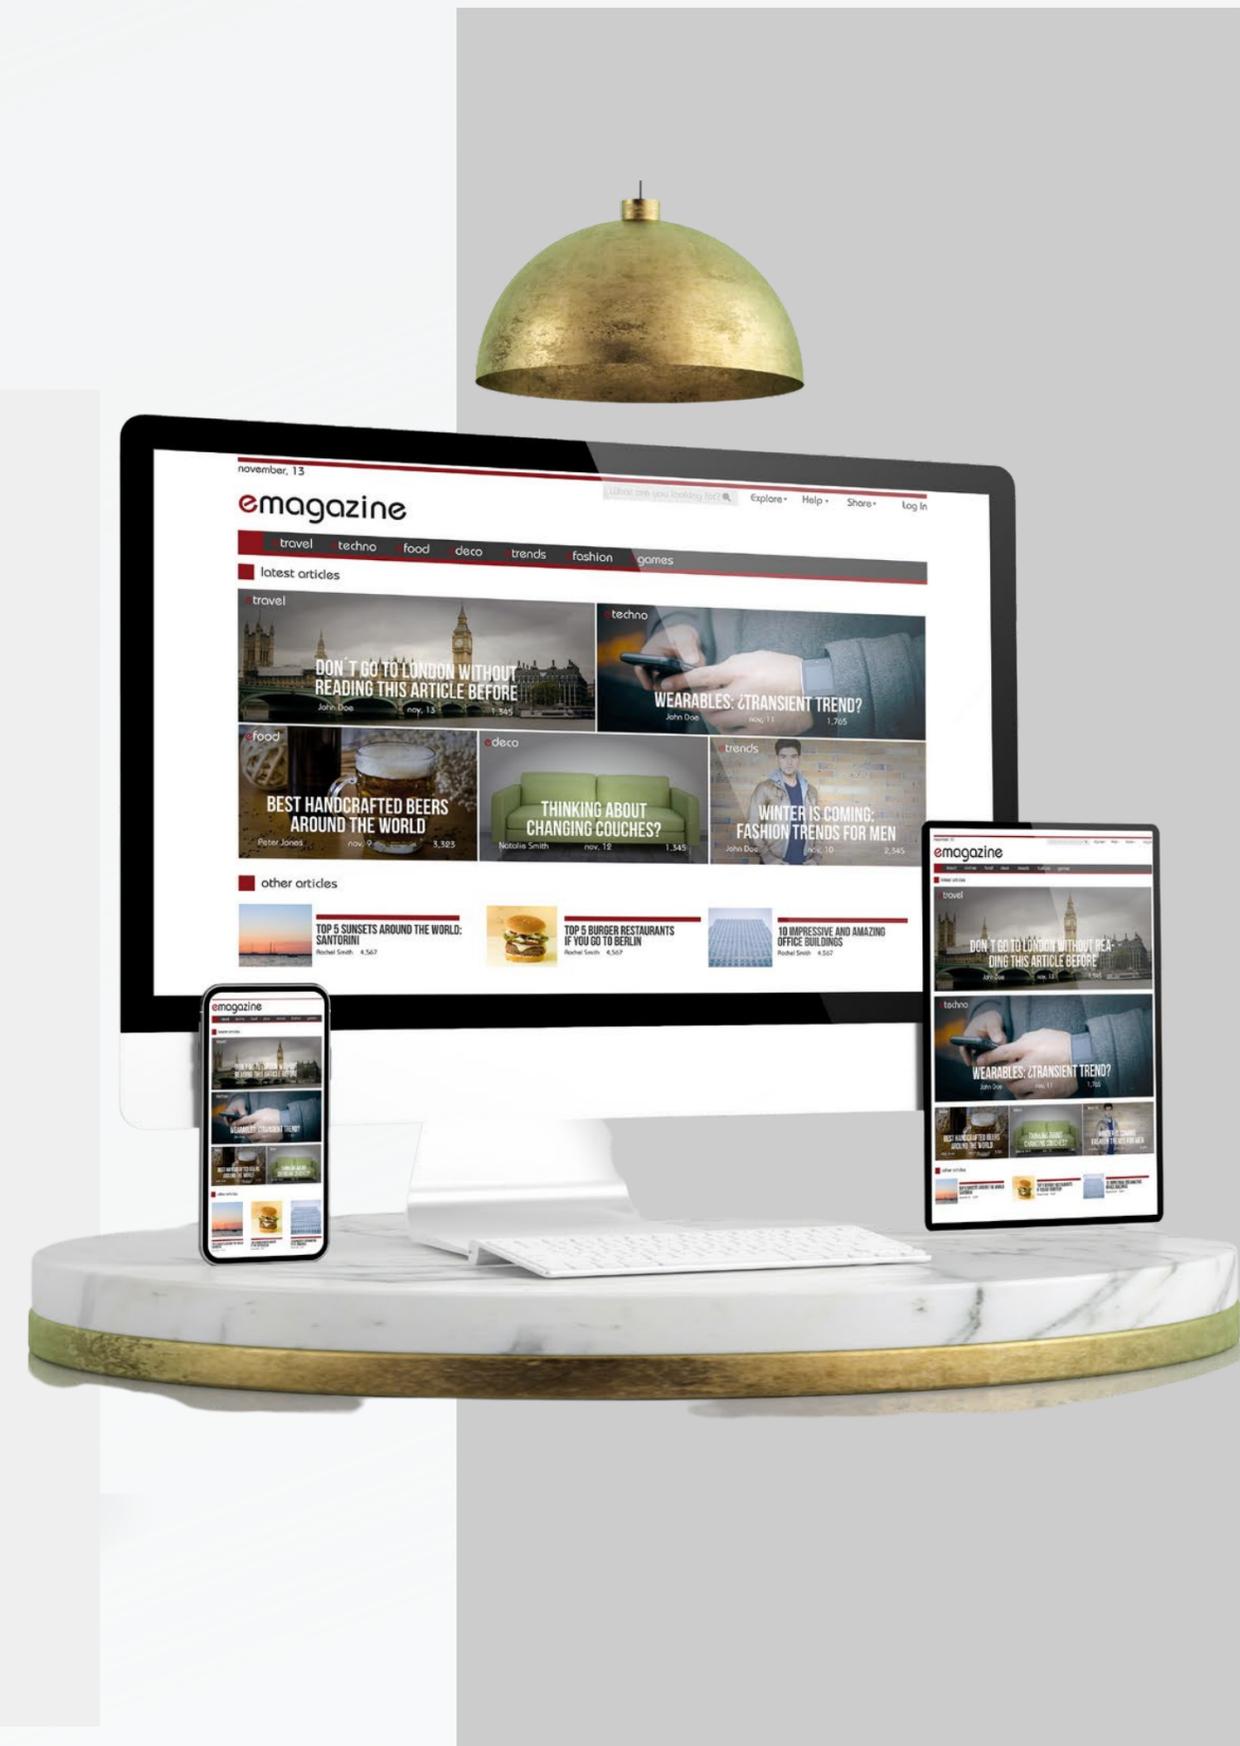

- Keep under **60 characters**.
- Use **primary keywords** naturally.
- Make it compelling for **click-through rate (CTR)**.

**Example:** *“Omaha’s Best Custom Home Builders | Free Consultations”*

**Meta Description** – Short summary for search engines & users.

- Keep under **160 characters**.
- Include a **call-to-action**.

**Example:** *“Looking for custom home builders in Omaha? Get expert craftsmanship and free estimates today.”*

# HEADER TAGS

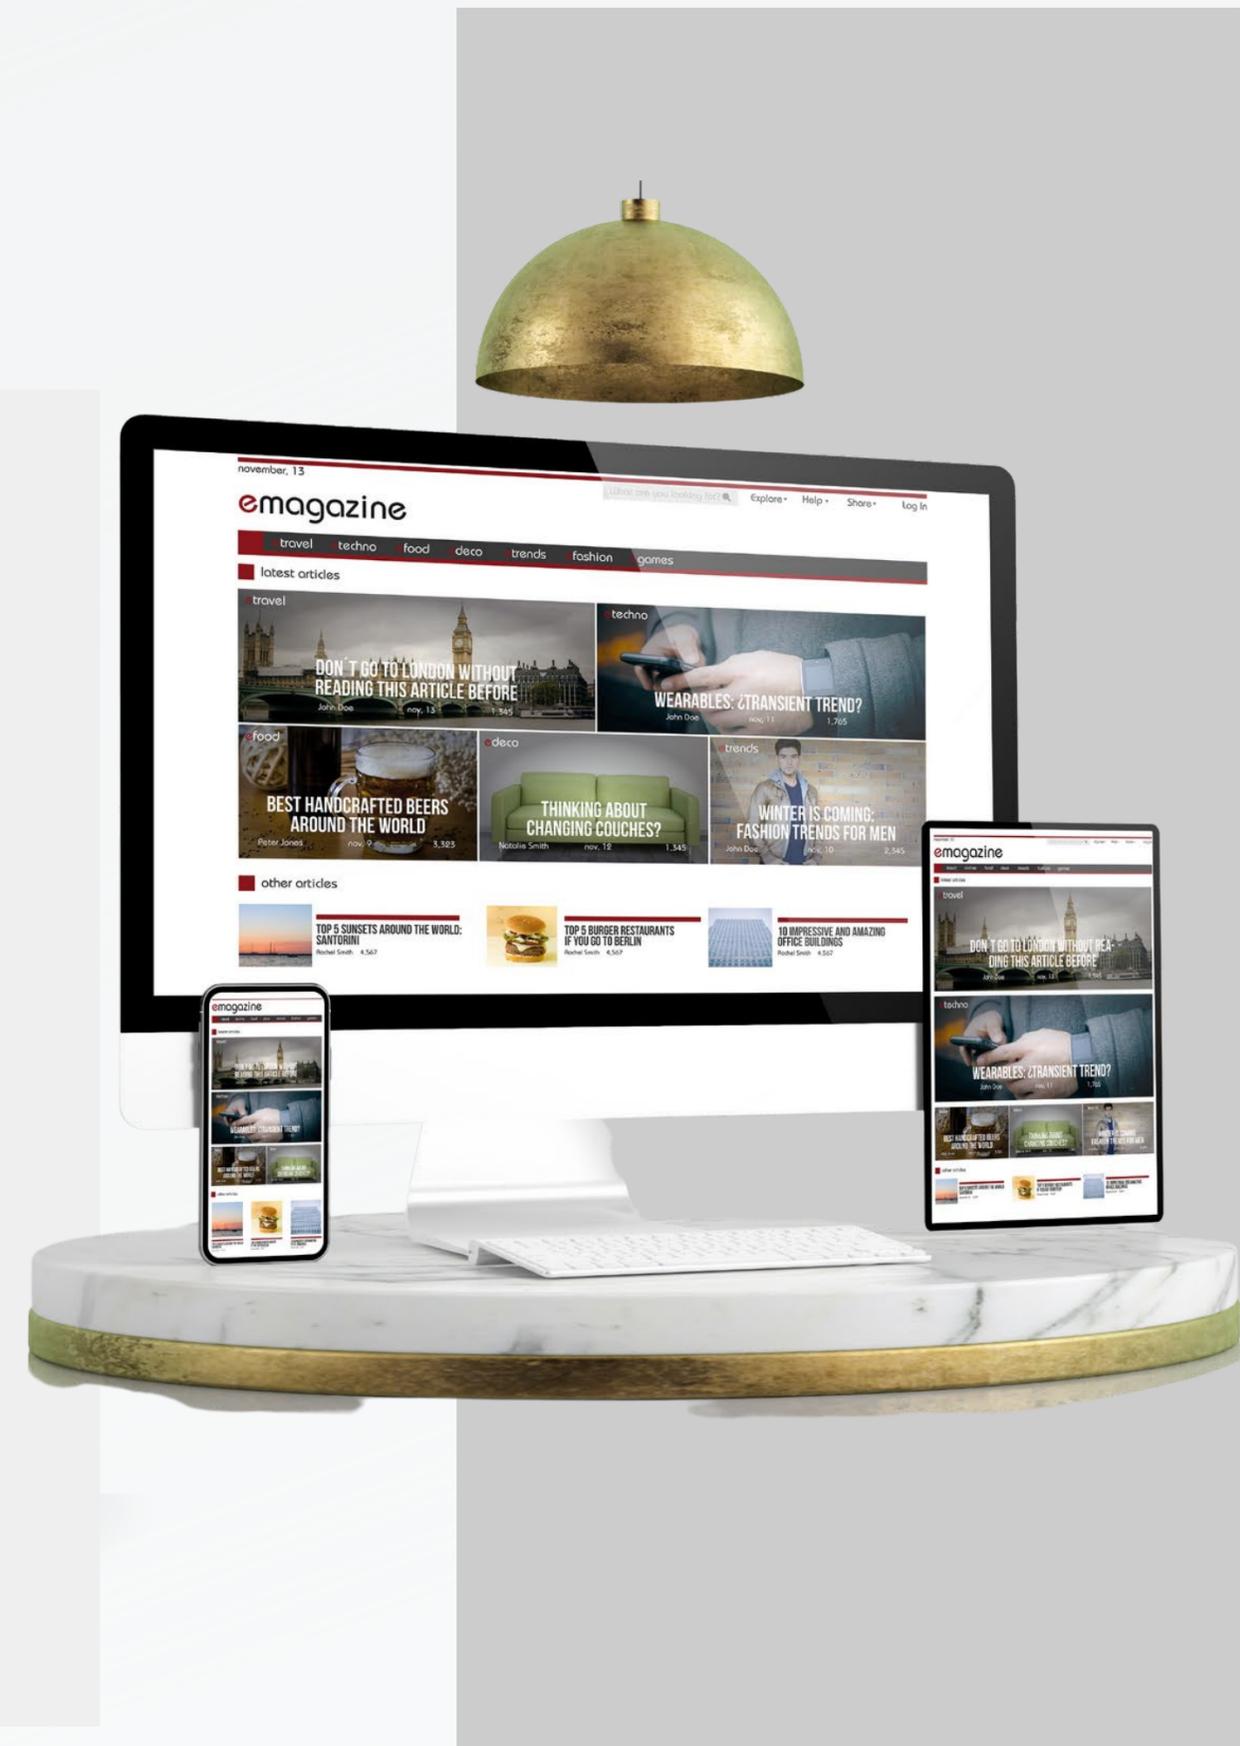

H1 (Main Heading) – Each page should have one unique H1 tag.

Example: “Trusted Electrical Services in Omaha”

H2, H3 (Subheadings) – Organize content & include keywords naturally.

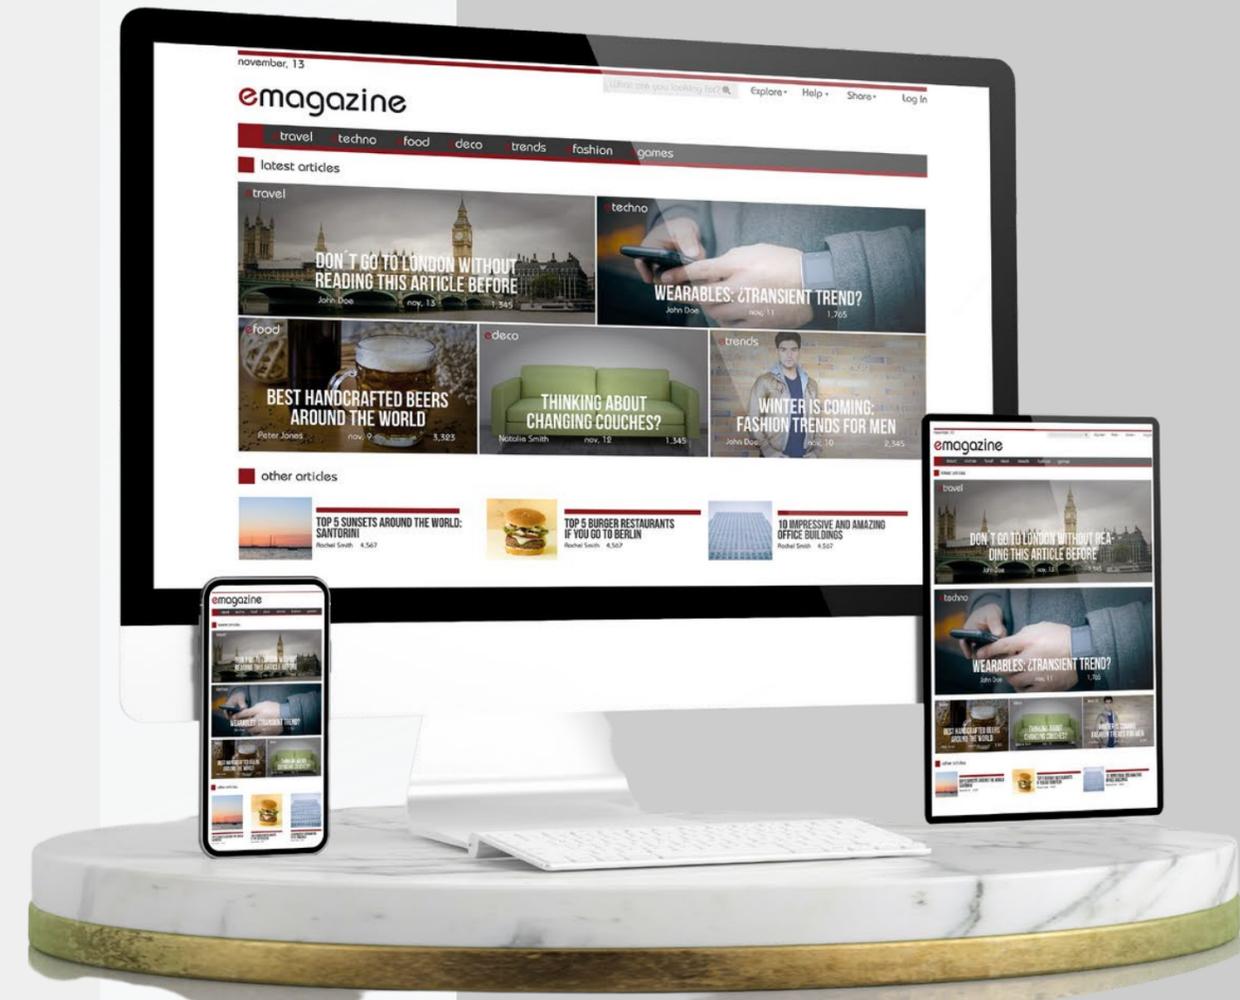

Example: H2: “Our Residential & Commercial Solutions”

Example: H3: “Why Choose Our Certified Electricians?”

# KEYWORD PLACEMENT & INTERNAL LINKING

- **Naturally integrate primary keywords** in content, headings, and first paragraph.
- **Use internal links** to connect related pages & guide users.
  - Example:
    - *Learn more about our [Residential Services](#)*
    - *Check out our [customer testimonials](#)*
- **Helps Google crawl deeper pages** and **keeps users on the site longer.**

# MOBILE-FRIENDLINESS & PAGE SPEED

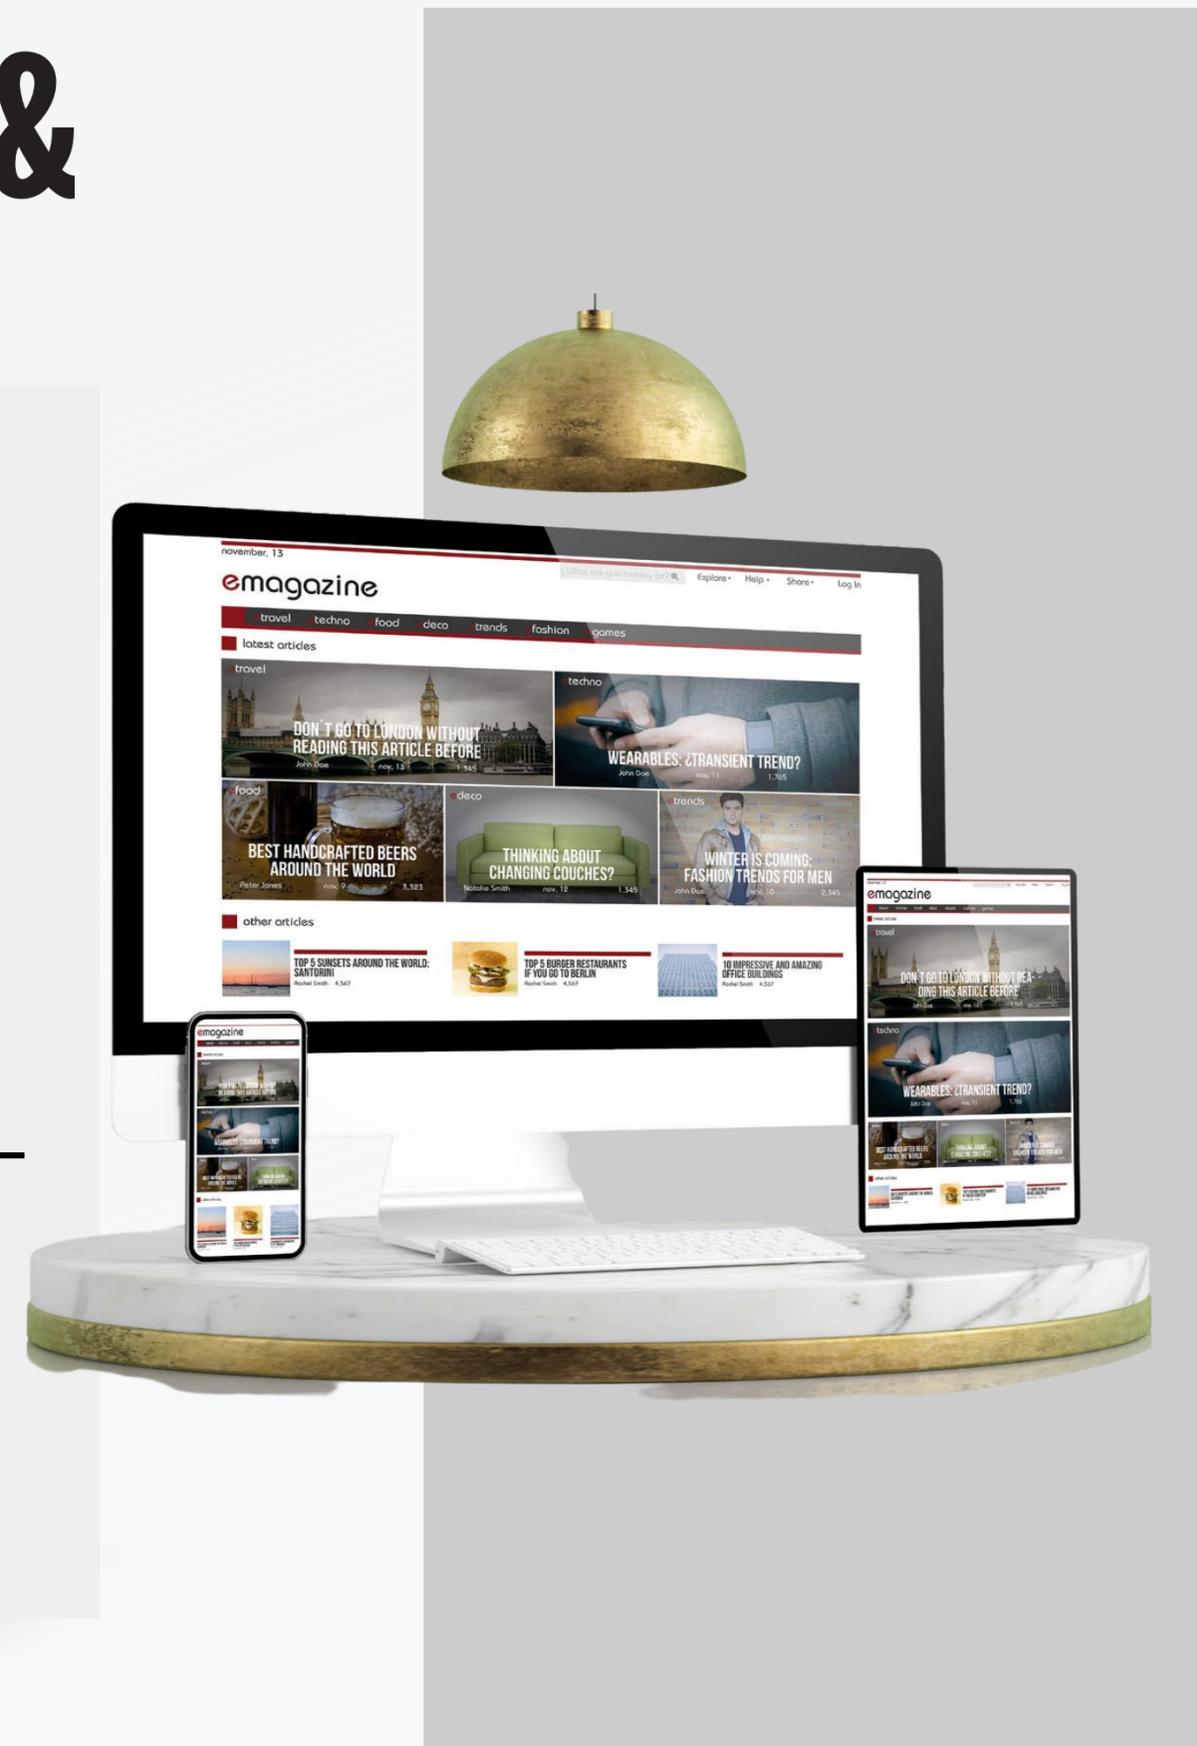

Google ranks mobile-friendly, fast-loading sites higher.

- Compress images
- Use fast web hosting
- Minimize large files and unnecessary scripts
- Use Google's PageSpeed Insights to check performance.

## **USING AI TO HELP WITH SEO STRATEGY**

You can pair your SEO Intake Form with AI tools like ChatGPT to brainstorm, audit, and create content faster and more effectively. Use these smart prompts to guide the AI with context and direction.

### **Brainstorm Target Markets, Value Proposition, Trends, and Needs**

Prompt:

“Using the SEO intake form, summarize the business’s defined target markets and value proposition. Then suggest additional or emerging customer segments, trends in customer behavior, or related needs the business might consider targeting.”

### **Brainstorm Keywords**

Prompt:

“Based on the business description in the intake form, generate a list of high-intent keywords and long-tail phrases that potential customers might search for. Include variations in phrasing and common questions.”

### **Evaluate SEO on Existing Content**

Prompt:

“Analyze the following website content. Highlight opportunities for improvement in clarity, keyword use, structure, and EEAT signals. Suggest specific changes to better align with SEO and AI search expectations.”

### **Evaluate Competitor Websites**

Prompt:

“Compare this business (from the intake form) with its top 2–3 competitors. What keywords are they targeting? What content gaps or advantages does our business have? Suggest SEO strategies to stand out.”

### **Generate Homepage Content**

Prompt:

“Using this intake form, write a homepage draft that reflects the business’s voice and goals. Make sure it’s clear, keyword-rich, and structured for both readers and search engines.”

### **Create Title Tags and Meta Descriptions**

Prompt:

“Using the intake form, create unique, SEO-friendly title tags (under 60 characters) and meta descriptions (under 160 characters) for the homepage and each service page.”

### **Suggest Structured Data (Schema Markup)**

Prompt:

“Based on the business type and services in the intake form, recommend appropriate schema markup (such as Local Business, Product, FAQ, or Organization) that would help search engines understand and enhance the site in results.”
